EDUCATION

2021- Present

SUPERIOR UNIVERSITY

- Bachelor of Computer Science

2019 - 2021

SUPERIOR COLLEGE

- FSc Pre-Engineering

SKILLS

- Frontend** - JavaScript, CSS, HTML, Bootstrap, React.js
- Backend** - PHP
- Other Languages** - C++, Python
- Database** - SQL, MySQL
- Technical Proficiencies** - OOP, DSA

LANGUAGES

- Urdu: Fluent
- English: Intermediate

PROFILE SUMMARY

Dedicated software developer with skills in front-end and back-end development. Proficient in JavaScript, CSS, HTML, Bootstrap, React.js, and PHP. Skilled with SQL and MySQL databases, and knowledgeable in C++, Python, OOP, and DSA. Eager to apply my skills to build innovative and efficient software solutions.

PROJECTS

Amazon Clone

Frontend

- I successfully constructed an Amazon clone frontend utilizing HTML and CSS, integrating my IT expertise. Throughout the process, I refined my web development skills, navigated challenges, and assimilated best practices in design and coding, showcasing my proficiency in frontend development.

MatrixMall

Frontend

- Creating the frontend for Matrix Mall was a journey filled with challenges. I worked tirelessly to make the designs user-friendly and integrated React and Tailwind CSS, overcoming technical hurdles along the way to deliver a seamless shopping experience.

Railway E-Ticket

OOP's Project

- I built a Railway E-Ticket program in C++ using object-oriented programming. The process included planning a ticketing system, organizing classes, and adding features like seat booking. Despite some challenges, I managed to create a functional solution for railway ticketing.

MathMind

Game

- A fun-filled game where kids dive into math challenges! With random questions on addition, subtraction, multiplication, and division, it's an interactive journey to boost math skills while having a blast."
